### **DETAILED ACTION**

On October 10, 2004 an Ex Parte Quayle Action was issued stating that original patent must be surrendered before issuing the reissue.

Recent rule makings and changes in the USPTO Practice having an effective date of September 21, 2004 does not require the reissue requirement for physical surrender of the original ("ribbon") patent. Surrender is automatic upon grant of reissue patent.

Therefore withdrawal of the Ex Parte Quayle Action is taken.

### **Allowable Subject Matter**

Claims 21-60 are allowed. The following is an examiner's statement of reasons for allowance: Claim 21 and 59 are allowable because the prior art does not teach or fairly suggest a method for separating plasma components by electrophoresis that comprises separating the plasma into a first and second component using a first electrophoretic separation membrane whereby the first component containing a mixture of albumin and a-1- antitrypsin resides on one side of the first electrophoretic separation membrane while the second component resides on the other side of the first electrophoretic separation membrane', separating the second component into third and

fourth components whereby the third component containing immunoglobulins is located on one side of a second electrophoretic separation membrane and the fourth component resides on the other side of the second separation membrane, removing material having a molecular mass greater than immunoglobulins from the third component using a third electrophoretic separation membrane whereby immunoglobulins reside on one side of the third electrophoretic separation membrane and material having a molecular mass greater than immunoglobulins reside on the other side of the third electrophoretic separation membrane', and separating albumin from alpha-I-antitrypsin in the first component using a fourth separation membrane whereby alpha-I-antitrypsin resides on one side of the fourth electrophoretic separation membrane and albumin resides on the other side of the fourth separation membrane. All depending claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
